Lab Objective

Lab File Services

1 **Install File Server Role**

Buka **Server Manager**

Manage
→ Add Roles and Features

Pilih:

File and Storage Services

Centang:

File Server

Lalu klik **Install**.

2 **Membuat Folder Share**

Buat folder:

C:\SharedData

3 **Share Folder**

Klik kanan folder

Properties
→ Sharing
→ Advanced Sharing

Centang:

Share this folder

Share name:

SharedData

4 Configure Share Permission

Klik kanan pada folder, **Sharing** > **Advanced Sharing** > **Permissions**

Contoh konfigurasi:

Group	Permission
Everyone	Read
IT-Group	Full Control

5 Configure NTFS Permission

Klik kanan **C:\SharedData**

Properties → Security → Edit → Add...

Tambahkan group:

IT-Group
Finance-Group

Contoh:

Group	Permission
